

Product Brief

PASS Software – Point-of-Sale, Virtual Terminal, Smart Phone

Provider:

TSYS Acquiring Solutions

Target Merchants

- Retail merchants, particularly those who use a PC at the point-of-sale
- Mail order/phone order merchants
- Mobile merchants (e.g., food delivery, flea market, craft show, taxi, field service, etc.)

Description

PASS Products—CounterPASS, WebPASS and Mobile Payment Acceptance—are software applications for processing transactions using PCs, the Internet and mobile phones. PASS products support credit and debit today, and were designed to add other payment types in the future, such as gift cards, money orders and remote deposit capture. PASS is a hosted solution, offering seamless updates for merchants and offsite data storage to facilitate PCI compliance.

Merchant Benefits of PASS:

- Easy to use with graphical icons and point-and-click menus
- Data stored in PCI-compliant data center
- Seamless application and compliance updates
- Real-time transaction, batch and settlement reports with search capabilities and export to Excel
- TSYS class A approved and backed by TSYS 24x7 support
- Supports multiple employees, each with a unique ID and password
- Billing is included with merchant account statement (no separate bill from a third party)
